

ANMOL SRIVASTAVA

Entry-Level Python Developer | SQL Developer | Data Analyst | IT Fresher

8528369805 | anmolsri41@gmail.com | GitHub | LinkedIn

Professional Summary

BCA graduate and current Data Analyst Intern with hands-on experience in Python, SQL, Excel, Power BI, and data analysis. Strong foundation in data cleaning, SQL querying, reporting, dashboard development, process automation, and analytical problem-solving, with working knowledge of ITIL practices and Generative AI concepts including LLMs, RAG, and LangChain. Built academic projects in sales and HR analytics using Python, SQL, Excel, and Power BI. Seeking opportunities in Python development, SQL development, data analytics, business intelligence, or IT.

Technical Skills

- **Programming:** Python, Pandas, NumPy, Matplotlib, Seaborn
- **Databases & SQL:** SQL, joins, filtering, aggregation, data extraction and analysis
- **Data Analytics:** Data cleaning, exploratory analysis, KPI analysis, trend analysis
- **BI & Visualization:** Power BI, Excel, Pivot Tables, formulas, dashboards, slicers
- **Generative AI:** Agentic AI, LLMs, RAG, Generative AI, LangChain
- **IT Service Management:** ITIL, incident, problem, change, and service request management
- **Tools:** GitHub

Experience

Data Analyst Intern

Sept 2026 – Present

SY Associates

- Develop Python scripts to automate repetitive data collection, cleaning, and reporting tasks, reducing manual effort.
- Write SQL queries to extract, join, filter, and aggregate data for business analysis and reporting.
- Prepare Excel reports using formulas, Pivot Tables, and slicers for day-to-day analysis.
- Build Power BI dashboards to present KPIs and trends to stakeholders.
- Apply ITIL practices to structure workflows, track requests and incidents, and maintain clear documentation.

Projects

Sales Dashboard | Power BI & Excel

- Cleaned and structured raw sales data in Excel for reporting and analysis.
- Built an interactive Power BI dashboard with filters for region, product, and month.
- Developed KPI views for total revenue, profit margin, and top-performing products.
- Used slicers and visualizations to support interactive analysis and business decision-making.

HR Analytics | Python, SQL & Power BI

- Cleaned and prepared employee data using Python and Pandas.
- Used SQL to analyze attrition, average tenure, departmental distribution, and related metrics.
- Analyzed employee performance, turnover, and demographic trends.
- Created a Power BI dashboard covering attrition trends, department-wise headcount, and performance ratings.

Education

Bachelor of Computer Applications (BCA)

2023–2026

Shri Ramswaroop Memorial University, Lucknow

Intermediate (12th) | S.S.K. Inter College, Gonda | 2022 | 62%

High School (10th) | S.S.K. Inter College, Gonda | 2020 | 82%

Certifications

- Power BI – Udemy
- Advanced Excel for Data Analysis – Udemy
- Advanced SQL for Data Analytics – Udemy

Leadership & Activities

- **Student Coordinator:** Coordinated and supervised a college fest, managing event planning, team responsibilities, coordination, and execution.

Additional Information

- **Languages:** English, Hindi
- **Open to:** Python Development, SQL Development, Data Analytics, Business Intelligence, and IT roles
